Professional Summary:

Security Operations professional with 8+ years of experience in SOC operations, incident response, network monitoring, and ISO 27001 implementation across MSP and enterprise environments. Brings hands-on experience supporting security operations, threat detection, and compliance while leading teams and improving IT processes.

Key Skills:

- **Cybersecurity**: SOC operations, incident response, threat detection, SIEM/EDR/XDR, vulnerability assessments, Active Directory, network monitoring, ISO 27001, disaster recovery, backup tools, asset management, vendor management, and cloud/security platforms.
- **Infrastructure Management**: Cloud Solutions (Google, Microsoft 365/Azure), LAN/WAN Administration, Virtualization
- **IT Service Management:** Helpdesk Support, SLA Management, Vendor & Asset Management
- **Technical Expertise**: Active Directory, Vulnerability Assessments, Disaster Recovery, Backup Solutions
- **Certifications Expertise:** Fortinet NSE (1-3), Microsoft Security Analyst Operations Certified, EC-Council CSA, Google Cloud Security Engineer, Splunk Sales Specialist, Mimecast Gladiator Expert, Sentinel-One and ESET

Work Experience:

NOC/SOC Engineer

BDR Group (MSP), UK (2025 – Present)

- Monitored network and security operations in a dynamic NOC/SOC environment, ensuring real-time threat detection and response.

- Troubleshot complex security and infrastructure issues, maintaining SLA commitments and minimizing downtime.

- Managed end-user technology projects, including cloud migrations, deployments, and proactive threat prevention.

- Analyzed and resolved network, system, and security challenges across workstations, servers, and cloud platforms.

- Performed alert triage, threat hunting, and incident response using SIEM, EDR, and XDR tools.

- Conducted vulnerability assessments and coordinated with teams for remediation and security enhancements.

- Generated reports on network performance, security incidents, and compliance metrics to support decision-making.

Senior IT Specialist

121 BPO Client Services, Century City, Cape Town (2024– 2025)

- Led ISO 27001:2022 implementation efforts and supported client-facing troubleshooting across workstations and servers, linking compliance work to operational security and service stability. Manage end-user technology projects, including migrations and deployments.

- Provide proactive client engagement, addressing technology needs and preventing issues.

- Analyze, troubleshoot, and resolve network and system challenges across workstations and servers.

- Collaborated with cross-functional teams to optimize IT infrastructure and improve operational efficiency.

- Developed and maintained documentation for IT processes and incident resolution procedures.

- Troubleshoot complex technical issues for clients and ensure SLA commitments.

Cyber Security Analyst

Redshoulder, Cape Town (MSP)- (Oct 2020 – May 2024)

- Monitored and analysed security events, investigated alerts, and supported incident response and threat analysis activities across networks and systems in an MSP environment. Investigated alerts and supported incident response activities
- Performed threat analysis to identify and mitigate cybersecurity risks
- Documented incidents and supported continuous improvement of security posture
- Worked with various security tools for detection and response
- Escalated critical threats and contributed to improved security operations

Service Desk Team Lead

Sharaf Shipping, Durban (2017 – 2020)

- Led first- and second-line support for infrastructure issues, managed incident and problem management workflows, and coordinated escalations with IT teams and vendors to support service continuity. Spearheaded IT architecture improvements, ensuring scalability and reliability.
- Delivered disaster recovery and business continuity advisory services.
- Over saw cloud solution management (Microsoft 365, Google Cloud & Azure).
- Developed and managed IT infrastructure budgets and vendor relationships.
- Managed incident and problem management processes, coordinating escalations with other IT teams and vendors.

Cloud Security:

- Google Cloud Security Engineer (Active)
- Certified Microsoft Architect SC-100 (Active)
- Microsoft Security, Compliance and Identity Fundamentals (Active)
- Microsoft Security Operations Analyst SC-200 (Active)
- Azure Security Engineer AZ-500 (Active)
- Google Cloud Workspace Administrator (Active)

Security Operations:

- Seceon aiXDR/SIEM/SOAR
- EC-Council CSA (Certified Security Operations Analyst) (Active)
- Splunk Sales Specialist
- SentinelOne Technical (101-301)

Security Framework:

- ISO 27001:2022 (Implementor)
- MITRE ATT&CK & NIST 800-53

Specialised Security:

- CompTIA Security+
- Fortinet NSE 1-2-3
- MITRE ATT&CK & NIST 800-53
- Mimecast Gladiator
- Veeam Xaas
- Elastic Endpoint Security Fundamentals

Education:

UniAthena

Diploma in Business Administration

Hobbies:

- Car Enthusiast
- Reading/watching Historical narrative exploration

Achievements & Impact:

- Successfully implemented ISO 27001:2022 standards, enhancing organizational security posture.
- Led the design and deployment of scalable SOC services, optimizing incident response.
- Improved team efficiency through mentoring, process optimization, and effective leadership.
- Delivered seamless IT migrations and upgrades, minimizing downtime and enhancing user experience.
